

### Hour Building

#### Description:

This course provides aircraft availability such that pilots may gain the Pilot In Command experience required for CPL training. The value of this course is not simply to spend time in the air, it is to improve the pilots airmanship and all areas so as to be best prepared for commercial training. This time should be used to avoid bad habits, develop navigation skills, experience a wider range of airports and engage in cross country flights required especially for IR training.
